CHARACTERISTICS MAY VARY ACCORDING TO COUNTRY

N104 EVO è l'evoluzione di N104 e si caratterizza per le nuove soluzioni tecniche, oltre che per il confort, ancora più elevato.

Il sistema di ventilazione di N104 EVO è stato completamente modificato e, grazie anche all'AirBooster Technology, offre un'ottima climatizzazione interna in ogni condizione di utilizzo.

Il nuovo interno tessile – completamente amovibile e lavabile - è realizzato in nuovi colori; nuova anche la conformazione dei guanciali, in grado di assicurare il massimo confort anche per i motociclisti più esigenti.

N104 EVO è, inoltre, dotato di una visiera particolarmente ampia (ultrawide visor) che permette al motociclista di fruire di un campo di visione superiore alla media. Completano le dotazioni di serie la visierina antiappannamento Pinlock®(*), lo schermo parasole VPS, il sistema di ritenzione Microlock² e la predisposizione per il sistema di comunicazione N-Com®.

The N104 EVO is an update of the N104 and combines new technical solutions with improved level of comfort.

Its newly designed ventilation system, conceived with a new AirBooster Technology, now offers better internal climate control in every condition.

The new fully removable and washable liner now comes in more colours. The cheek pad configuration is also new, ensuring maximum comfort for even the more demanding motorcyclists.

The N104 EVO is also fitted with an ultrawide visor allowing the motorcyclist to enjoy a wider than average field of vision. It also comes with a Pinlock®() anti-fog inner visor. A VPS sunscreen, Microlock² retention system and set up for the N-Com® communication system complete the standard outfit of this stunning helmet.*
