

BLACKVUE™

Over the Cloud

Me and My Car. Connected.

FEATURES

Live View

Emergency Alarm

GPS Tracking

Two-way Voice Communication

Video backup

Remote video playback

1. What is BlackVue Over the Cloud?

BlackVue Over the Cloud combines state-of-the-art dashcam technology with cloud ubiquity to make the most out of your BlackVue dashcam. Video backup, real-time GPS-tracking, alarm, the possibilities are endless. BlackVue Over the Cloud is all about using your dashcam to its full potential, so that you and your car are always connected.

2. How does it work?

Taking advantage of a mobile or car-embedded Internet connection and a BlackVue dashcam, BlackVue Over the Cloud connects you to your car through the Cloud. Using the BlackVue App on your smartphone or tablet, you see in real time where your car is located and what is happening around it.

Compatibility

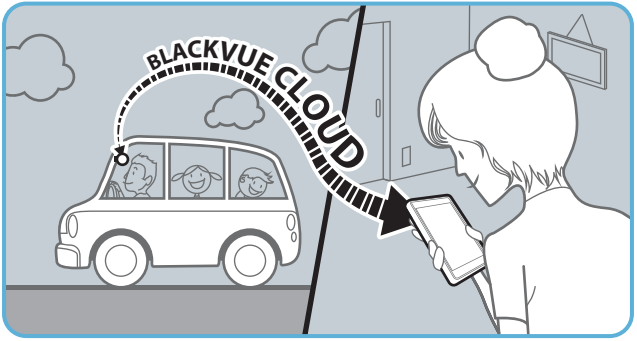

Compatible operating systems

iOS, Android, Windows, Mac.

Compatible dashcam models

- DR650GW-1CH
- DR650GW-2CH
- DR650GW-2CH Truck

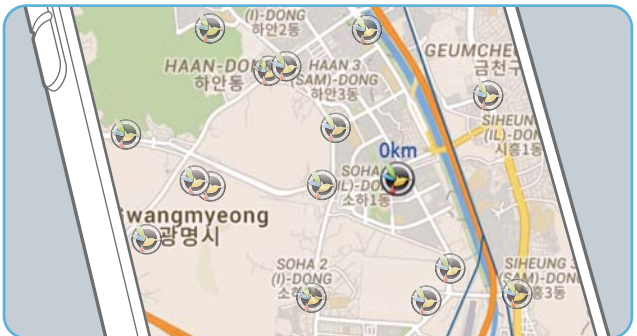

Live View

- Remotely monitor your car in real time.

Emergency Alarm

- Receive notifications on your phone when preset events occur.

GPS Tracking

- Visualize on a map your car's location and speed.

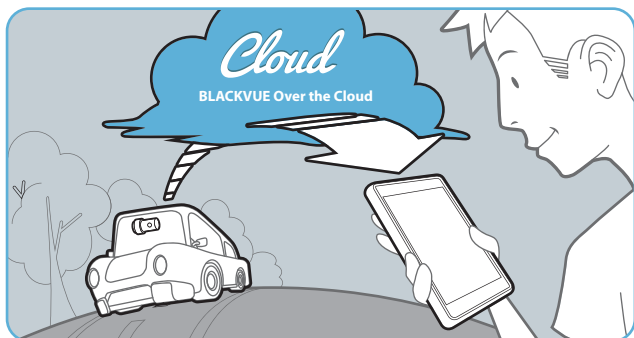

Two-way voice communication

- Talk with people in the car from your smartphone.

Video backup.

- Move files from your dashcam to the Cloud storage or your smartphone/tablet, right from the app.
- No more worrying about videos being overwritten on your dashcam's storage.

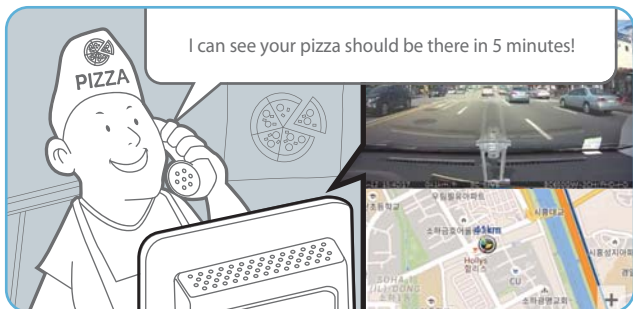

Remote video playback

- Play videos stored in the Cloud or in your dashcam anytime on your smartphone or tablet.

4. How can BlackVue Over the Cloud benefit you?

Drivers love the peace of mind procured by dashcams, as those embedded cameras can provide video proof in case of an accident. BlackVue Over the Cloud largely augments the features of a dashcam by pairing it with the Cloud.

BlackVue Over the Cloud provides value to everyone.

- A. Individuals can connect to their car from anywhere, anytime, and be alerted whenever events occur (accident, disconnection of dashcam from the Cloud).
- B. Small businesses owners can monitor delivery vehicles on a map in real time and communicate with them directly thanks to the integrated two-way communication function.
- C. Larger companies can take advantage of BlackVue Over the Cloud to monitor their fleets of vehicles and greatly reduce installation and maintenance costs in comparison to traditional surveillance systems, while also enjoying rich data in real time.

About Pittasoft

Pittasoft has set the standard in the car dashcam industry since it was established in 2007. Taking car dashboard camera technology to the next level with its groundbreaking Full-HD 1-channel and 2-channel cameras, Pittasoft has enabled global customers to maximize usability by connecting car dashcams to smart devices via Wi-Fi and BlackVue Cloud services. Anytime, anywhere, BlackVue Cloud provides comfort with instant access to playback, live view and video publishing to YouTube as well as peace of mind with emergency alarm, location tracking and backup of important footage.
